

## **Technology Education expectations and guidelines**

I have a very good sense of humor; don't mistake it for an easy "A". Because of demand, technology is changing all the time. I like to keep things light. Students will be constantly challenged with real world applications.

Technology education students are expected to:

- work harder in my class than in any other class.
- pass a safety test with a score of 90 or better.
- have prep items everyday
- be on time for class
- be part of the solution
- complete all activities and projects
- have fun and try your best
